

FALL 2021

---

**In This Issue:** Upcoming Omics Resource Calls | Product Phase-Out | AGU Fall Meeting | Multimedia Resources | Latest Genome Insider and Natural Prodcast Podcasts | New Data Policy | Annual Meeting Save the Date

---

A graphic for 'Get Your Omics On' featuring a stylized brain with circuitry and molecular structures. The brain is composed of a blue wireframe mesh with glowing green and blue nodes. Inside the brain, there are several microchips and molecular models. The background is dark with glowing green and blue lines and dots.

## Get Your Omics On — Upcoming Resource Calls Open to All

Community Science Program (CSP) [Functional Genomics Call](#);

Proposal deadline: January 31, 2022

CSP [New Investigator Call](#); Proposal deadline: March 3, 2022

Annual Calls for the [Large-Scale CSP](#) and [FICUS](#), to tap the resources of both the JGI and [EMSL](#), open in January and close in early spring.

## Product Phase-Out

The JGI conducted an extensive internal product audit to analyze the scientific value, demand, and costs of current offerings in the JGI product catalog informing priorities for future product expansion or elimination. **The JGI will no longer offer** smRNA, bisulfite, or ChIP sequencing, beginning with FY23

## Let's Get (Geo)Physical

The JGI with [EMSL](#) and [ARM](#) will host two Town Hall Meetings at the American Geophysical Union (AGU) Fall Meeting: December 7 and 9.

**12/07/21:** "Collaborate With a U.S. DOE User Facility: Expertise and Resources, Open-Call Opportunities, and Important Tips for Submitting Successful Proposals"

**12/09/21:** "Maximize Your Research by Harnessing Multiple Scientific User Facilities in One Proposal via FICUS"

[Check out JGI- and User-relevant sessions and poster presentations.](#)

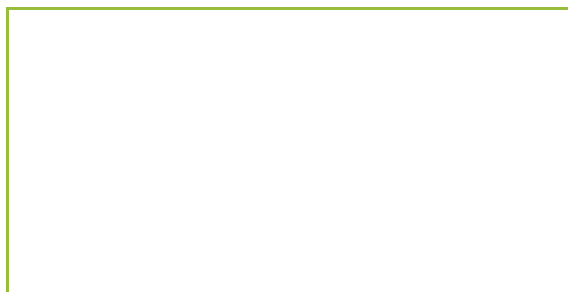

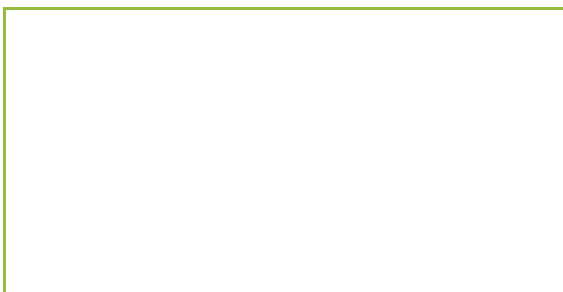

## ICYMI: Tap JGI Multimedia Resources

- [2021 Annual Meeting videos.](#)
- [2021 Viral EcoGenomics & Applications \(VEGA\) Symposium.](#)
- [2021 New Lineages of Life \(NeLLi\) Symposium.](#) This includes presentations on [MetaHipMer for Terabyte Scale Assemblies](#), the recent winner of a HPC Editors' Choice Award for best use of high performance computing in Life Sciences.
- [Webinars/Tutorials.](#)

**Are you Listening?**  
**Stream the Latest JGI Podcasts**

### Genome Insider

Featuring: [2021 JGI-UC Merced Program interns](#) describing their dives into genomics, computational tools and big data. Also, hear the progress from our [CBI](#) at [ORNL](#) about the genomics secrets in [poplar, the “bioenergy tree.”](#) In another episode, John Mullet, a biologist at Texas A&M University, shares how [sorghum plays a big role](#) in our energy future.

### Natural Prodcast

The latest episode engages [University of Strathclyde’s Katherine Duncan](#) (image credit: Dr. Mary-Ann Lea) whose research focuses on marine microbial chemical ecology, bios, and more. Also, hear [JGI Director Nigel Mouncey](#) share his vision for enabling natural products JGI user research.

## Data (Policy) Curious?

The JGI released the [New Data Policy](#) earlier this year. We stand at the ready to address your questions/concerns.
